

Providing comprehensive information for parents and carers about children's kidney conditions.

infoKID provides high quality information about kidney conditions in babies, children and young people, including symptoms, causes, diagnosis, treatment and management.

All infoKID topics have been written in collaboration with doctors, nurses and other healthcare professionals to help ensure the content is accurate and relevant.

Topics cover:

- symptoms and complications
- causes
- tests to diagnose or find out more
- treatments
- follow up
- what may happen in the future
- further information to help support your child with a kidney condition.

You can freely access all topics on our website, either web versions or downloadable leaflets at www.infoKID.org.uk

Kidney Care UK is the leading UK charity providing support to kidney patients and working to improve care services.

With over 100 patients supported every week, and around £3 million invested every year, we are committed to improving the quality of life for everyone affected by kidney disease.

We do this by:

- Providing information, advice, counselling and patient support services.
- Providing grants to help patients in times of financial hardship.
- Campaigning to inform policy and practice that improves the lives and choices of kidney patients.
- Funding improvements in patient services and care.
- Commissioning research to improve health and care services.
